Education

Univerisity of Science, VNUHCM

Master of Science in Computer Science, majoring in Artificial Intelligence.

Current GPA 4.00/4.00

Relevant Coursework: Mathematics for AI, Machine Learning, and Natural Language Processing.

Ho Chi Minh City, Vietnam

Dec 2024 - Present

Univerisity of Science, VNUHCM

Bachelor of Science in Computer Science, Honors Program

GPA: 3.88/4.00

Graduation Thesis Title: Fake News Analysis and Detection

Ho Chi Minh City, Vietnam

Oct 2020 - Oct 2024

Thesis Score: 10.00/10.00 (4.00/4.00)

Experience

Autonomous Inc

AI Engineer

Ho Chi Minh City, Vietnam

Mar 2025 - Present

- Build fascinating AI agents with OpenAI and Langchain for real-world applications.
- Turn existing MCP servers into AI agents.
- Optimize AI agents to perform stably on local environment (MacOS-centric) with small models (for example, Qwen-4B) by context engineering.

SELab, University of Science, VNUHCM

Research Assistant

Ho Chi Minh City, Vietnam

Jan 2025 - Present

- Participate in research in the multimedia field.
- Research Interests: Computer Vision, Deep Learning, Multimedia Verification, Generative AI Application.

Saritasa

Backend Engineer

Ho Chi Minh City, Vietnam

Jun 2023 - Feb 2025

- Developed, optimized, and maintained the backend side for several projects, with a significant number of users in the US market, in Django and Django REST Framework, combined with PostgreSQL and Celery.
- Familiar with Version Control System, especially Git, be aware of Git flow and GitHub flow.
- Experienced with DevOps tools such as Kubernetes or Teleport.

Backend Engineer Intern

Mar 2023 - May 2023

- Be trained with essential skills for a back-end developer, especially for Python with Django, Docker usage, and PostgreSQL.
- Be aware to provide a clean codebase, with a strict follow of the PEP8.

Projects

Fake News Analysis and Detection

Feb 2024 - Aug 2024

Undergraduate thesis at the University of Science, VNUHCM.

Propose the usage of an end-to-end network of the Visual Entailment task to solve both tasks of the cheapfakes detection challenge.

Introduce a cheapfakes data augmentation method with LLMs.

Implement a reputation checking module to check the image over the Internet to utilize social information.

Develop an open system to assist users in fake news analysis and detection with the help of an external forensic framework.

Role: Co-Developer.

GitHub URL: <https://github.com/nbtin/fakenews-detection-demo>

Skills & Interests

Technical: Python, PyTorch, FastAPI, Django, C++.

Language: English, Vietnam.

Soft Skills: Team work, communication.

Certificates & Awards

Third Prize, The 26th Student Scientific Research Award - Euréka 2024 Ho Chi Minh City, Vietnam
Student Scientific Research Award – Euréka is a prestigious award for students interested in scientific research across the country, contributing to the promotion of the scientific research movement of university students. The Ho Chi Minh Youth Union of Ho Chi Minh City hosts the award in collaboration with the National University of Ho Chi Minh City.
Dec 2024

Third Prize, The 2024 “AI City Challenge” (AIC) of Ho Chi Minh City Ho Chi Minh City, Vietnam
The 2024 AI City Challenge is hosted by the Department of Information and Communications of Ho Chi Minh City, aiming to provide information retrieval solutions on Vietnamese news data.
Dec 2024

Certificate of Satisfactory Progress from President of Vietnam National University Ho Chi Minh City Ho Chi Minh City, Vietnam
This certificate is awarded by the President of Vietnam National University, Ho Chi Minh City, to students who have graduated with a high distinction degree.
Dec 2024

Other Activities

Reviewer of the 1st Workshop on Ambiguous Object Analysis in Computer Vision (AOCV) at ACM Multimedia 2025 (ACM MM'25).
